Global Lithium Producers Index ETF

ETF Snapshot

Get Exposure to the Global Lithium Market

The Horizons Global Lithium Producers Index ETF (the “ETF” or “HLIT”) is the first Canadian-listed ETF focused exclusively on providing exposure to the global lithium market.

HLIT seeks to replicate, to the extent possible and net of expenses, the performance of an index that is designed to provide exposure to the performance of global, publicly listed companies engaged in the mining and/or production of lithium, lithium compounds, or lithium related components. Currently, HLIT seeks to replicate the performance of the Solactive Global Lithium Producers Index, net of expenses. HLIT seeks to hedge the U.S. dollar value of its portfolio to the Canadian dollar at all times.

Name:

Horizons Global Lithium Producers Index ETF

Launch Date:

June 23, 2021

Ticker:

HLIT

Management Fee:

0.75% (Plus applicable sales taxes.)

Investment Manager:

Horizons ETFs Management (Canada) Inc.

Underlying Index:

Solactive Global Lithium Producers Index

Bloomberg Index Ticker:

SOLGLITN

Distributions:

Annually, if at all

Currency Hedging:

Yes

Rebalanced:

Quarterly

Eligibility:

All registered and non-registered investment accounts

Global Lithium Producers Index ETF

Lithium

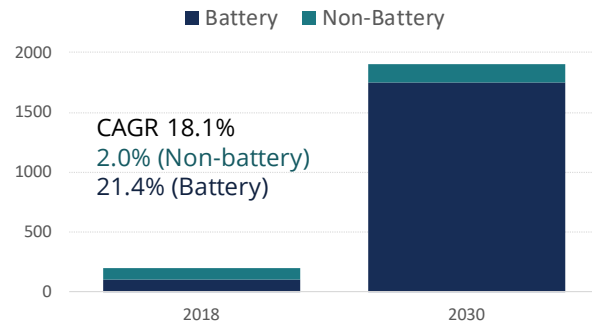

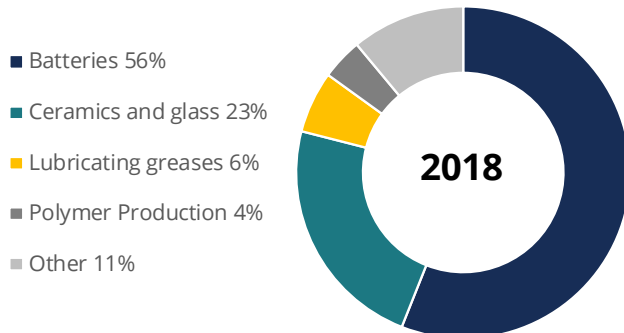

Fueling the Future of Battery Technology: Lithium

Lithium, the world's lightest metal, is an essential material used in lithium-ion batteries, which play an increasingly important role in areas like electric vehicles and renewable energy storage. Lithium-ion is generally lighter, more efficient, and more durable than competing battery chemistries. The growth of these industries and their dependence on lithium-ion batteries is driving unprecedented demand for lithium, causing lithium miners to rapidly scale operations.

Current and Expected Lithium Demand (LCE BASIS) 2018 - 2030 (in 000s)

Source: Global X Research, Benchmark Mineral Intelligence, US Department of the Interior US Geological Survey.

Note: Lithium Carbonate Equivalent (LCE) 2018 demand = 200,070 mt; 2030 expected demand = >1,000,800 mt.

The Solactive Global Lithium Producers Index

As its name implies, the Solactive Global Lithium Producers Index intends to track the price movements of global companies where a significant part of the business operations, as determined by ARTIS®, which is a proprietary software tool of the index provider, is (or is expected to be) related to the Lithium industry. This will include companies involved in the exploration, extraction, and processing of lithium, and may include companies involved in the production of materials necessary to the lithium component industry.

Key Index Methodology Features

- The Solactive Global Lithium Producers Index is a modified market capitalization-weighted index. Constituent Issuers with the largest market capitalization will receive higher index weights in proportion to other constituents in the index
- Constituent Issuers will be drawn from publicly listed companies in developed and emerging markets and may include small-, mid-, and large-capitalization companies

Global Lithium Producers Index ETF

Key Features

Key Features

- **Global Diversification:** Globally diversified portfolio of securities
- **Growing Demand:** Exposure to a commodity that benefits from increased demand for lithium-ion batteries, which are increasingly used in electric vehicles and electronic devices
- **Correlated to the Alternative Energy Transition:** Lithium-ion batteries are helping to replace fossil-fuel based engines, a major carbon emitter
- **Access Broader Lithium Industry:** Diversified range of larger- and smaller-market cap lithium miners, explorers and processors
