The indicated rates of return are the historical annual compounded total returns including changes in per unit value and reinvestment of all distributions, and do not take into account sales, redemption, distribution, or optional charges or income taxes payable by any securityholder that would have reduced returns. The rates of return shown in the table are not intended to reflect future values of the ETF or future returns on investment in the ETF. Only the returns for periods of one year or greater are annualized returns. HRAA metrics are computed in CAD, while those for the other ETFs/index are computed in USD.

The Fund is designed to be an all-terrain investment solution, actively managing long and short exposures to a diverse universe of global asset classes including equity indices, government bonds, currencies, and commodities.

It combines a core portfolio composed of diversified and risk-balanced global asset classes (beta) with an actively managed macro trading strategy (alpha).

April 2023 Performance Highlights

- Soft commodities were, by far, the largest profitable sector, led by long exposure to sugar.
- Equity indices also offered important gains, from longs in the French CAC40, Japanese Nikkei and Topix, as well as shorts in the S&P500 and Russell 2000.
- Metals (short copper, long silver) and currencies (short Japanese Yen and Aussie Dollar, long British Pound and Euro) also contributed positively.
- Grains were the only detractors, driven by longs in corn, KC wheat, soybeans and soy meal, though short milling wheat offered important offsetting gains.
- From a strategy perspective, the core “beta” portfolio was flat for the month, while the alpha stack experienced strong returns led by Carry and Trend.

Analysis by ReSolve Asset Management SEZC (Cayman). April and YTD return figures based on total return as of April 30, 2023. Data Source: Horizons ETFs, Tiingo, Y-Charts and S&P Dow Jones Indices. Metrics for HRAA are expressed in CAD, while those for ACWI, BNDW and AOR are expressed in USD. Calculations of Standard Deviation, Max Drawdown and Sharpe ratio are based on year-to-date total return as of April 30, 2023.

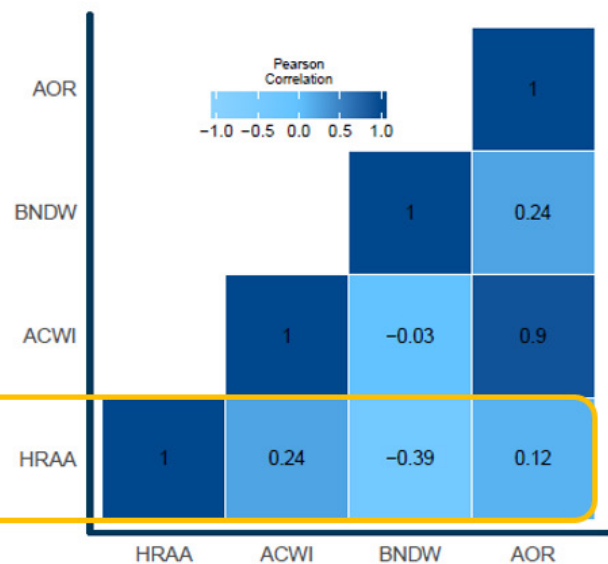

Since HRAA¹ is a globally diversified multi-asset strategy, it is important to show its performance against a cross-section of different assets and asset allocation strategies to highlight its absolute return profile and potential diversification benefits.

The ETFs used in this analysis are selected as benchmark proxies used to represent various asset class exposures. ACWI² represents large-cap global equities, BNDW³ represents global investment-grade bonds, and AOR⁴ represents a growth-oriented balanced portfolio.

Strategy Highlights

◆ HRAA complements traditional portfolios by striving to **address two vulnerabilities in traditional stock-bond portfolios:**

1. Prolonged bear markets, which investors haven't seen in over a decade
2. Inflationary regimes, which many investors haven't experienced in their lifetime

◆ In these challenging environments, the Fund will strive to provide positive results where most traditional portfolios generally suffer

◆ During concentrated bull markets, HRAA may underperform the highest-returning sectors

Investment Objectives

¹The Horizons ReSolve Adaptive Asset Allocation ETF seeks long-term capital appreciation by investing, directly or indirectly, in major global asset classes including but not limited to equity indexes, fixed income indexes, interest rates, commodities, and currencies.

²The iShares MSCI ACWI ETF seeks to track the investment results of an index composed of large and mid-capitalization developed and emerging market equities.

³The Vanguard Total World Bond ETF seeks to track the performance of a broad, market-weighted index that measures the investment return of investment-grade U.S. bonds and investment-grade non-U.S. dollar-denominated bonds.

⁴The iShares Core Growth Allocation ETF seeks to track the investment results of an index composed of a portfolio of underlying equity and fixed income funds intended to represent a growth allocation target risk strategy.

MONTHLY ATTRIBUTIONS

Risk allocation refers to the proportion of total portfolio standard deviation that is expected to derive from a market.
