¹Each ETF pays annual management fees to the Manager equal to an annual percentage of the net asset value of the units/shares of that ETF, together with applicable sales tax. The management fee rates of each ETF, excluding the applicable sales tax, are presented in the table. ²Management Expense Ratio (MER) is based on total expenses, including sales tax, (excluding commissions and other portfolio transaction costs) for the stated period for each ETF and is expressed as an annualized percentage of each ETF's daily average net asset value during the period. Out of its management fees, the Manager pays for such services to the ETF as investment manager compensation, service fees and marketing. ³The Trading Expense Ratio (TER) represents total commissions and other portfolio transaction costs incurred by each ETF expressed as an annualized percentage of each ETF's daily average net asset value during the period. ⁴The MERs and TERs for this ETF include an estimated proportion of the MER and TER for any underlying investment funds held, or was exposed to, in the ETF's portfolio during the period. ⁵The MER for this ETF includes Performance Fees paid to the Manager, if any, and any security borrowing costs. ⁶Effective August 25, 2023, the investment objectives, investment strategies, management fees, currency hedging and distribution policies of the Horizons Conservative Asset Allocation ETF (formerly Horizons Conservative TRI ETF Portfolio) ("HCON"), the Horizons Balanced Asset Allocation ETF (formerly Horizons Balanced TRI ETF Portfolio) ("HBAL") and the Horizons All-Equity Asset Allocation ETF ("HEQT") (formerly Horizons Growth TRI ETF Portfolio ("HGRO")), were changed following receipt of the required unitholder and regulatory approvals. For more information, please refer to the disclosure documents of the ETFs at www.HorizonsETFs.com. ⁷Effective January 1, 2023, the annual management fee rate for HXT is 0.07%, plus applicable sales tax. However, for 2022 the Manager rebated 0.03% of that amount so that the effective annual management fee on the ETF was 0.04%, plus applicable sales taxes. ⁸Annual management fee reduced from 0.14% to 0.10%, effective August 18, 2022.

Commissions, management fees and expenses all may be associated with an investment in exchange traded products managed by Horizons ETFs Management (Canada) Inc. (the "Horizons Exchange Traded Products"). The Horizons Exchange Traded Products are not guaranteed, their value changes frequently and past performance may not be repeated. Certain ETFs may have exposure to leveraged investment techniques that magnify gains and losses and which may result in greater volatility in value and could be subject to aggressive investment risk and price volatility risk. Such risks are described in the prospectus. The prospectus contains important detailed information about the ETF. **Please read the relevant prospectus before investing.**

Commissions, management fees, and expenses all may be associated with an investment in the Horizons High Interest Savings ETF ("CASH"), the Horizons US Dollar Currency ETF ("DLR"), the Horizons Cash Maximizer ETF ("HSAV"), and the Horizons USD Cash Maximizer ETF ("HSUV.U") (or collectively, the "ETFs") managed by Horizons ETFs Management (Canada) Inc. The ETFs are not covered by the Canada Deposit Insurance Corporation, the Federal Deposit Insurance Corporation or by any other government deposit insurer. There can be no assurances that the ETFs will be able to maintain their net asset value per security at a constant amount or that the full amount of your investment in the ETFs will be returned to you. Past performance may not be repeated. The prospectus contains important detailed information about the ETFs. **Please read the prospectus before investing.**

Certain ETFs managed by Horizons ETFs are alternative mutual funds ("Alternative ETFs") within the meaning of National Instrument 81-102 Investment Funds ("NI 81-102") and are permitted to use strategies generally prohibited by conventional mutual funds, such as the ability to invest more than 10% of their net asset value in securities of a single issuer, the ability to borrow cash, to short sell beyond the limits prescribed for conventional mutual funds and to employ leverage of up to 300% of net asset value. These strategies will only be used in accordance with the investment objectives and strategies of the applicable Alternative ETFs.

The Horizons Exchange Traded Products include our BetaPro products (the "BetaPro Products"). The BetaPro Products are alternative mutual funds within the meaning of National Instrument 81-102 Investment Funds, and are permitted to use strategies generally prohibited by conventional mutual funds: the ability to invest more than 10% of their net asset value in securities of a single issuer, to employ leverage, and engage in short selling to a greater extent than is permitted in conventional mutual funds. While these strategies will only be used in accordance with the investment objectives and strategies of the BetaPro Products, during certain market conditions they may accelerate the risk that an investment in shares of a BetaPro Product decreases in value. The BetaPro Products consist of our Daily Bull and Daily Bear ETFs ("Leveraged and Inverse Leveraged ETFs"), Inverse ETFs ("Inverse ETFs") and our BetaPro S&P 500 VIX Short-Term Futures™ ETF (the "VIX ETF"). Included in the Leveraged and Inverse Leveraged ETFs and the Inverse ETFs are the BetaPro Marijuana Companies 2x Daily Bull ETF ("HMJU") and BetaPro Marijuana Companies Inverse ETF ("HMJI"), which track the North American MOC Marijuana Index (NTR) and North American MOC Marijuana Index (TR), respectively. The Leveraged and Inverse Leveraged ETFs and certain other BetaPro Products use leveraged investment techniques that can magnify gains and losses and may result in greater volatility of returns. These BetaPro Products are subject to leverage risk and may be subject to aggressive investment risk and price volatility risk, among other risks, which are described in their respective prospectuses. Each Leveraged and Inverse Leveraged ETF seeks a return, before fees and expenses, that is either up to, or equal to, either 200% or -200% of the performance of a specified underlying index, commodity futures index or benchmark (the "Target") for a single day. Each Inverse ETF seeks a return that is -100% of the performance of its Target. Due to the compounding of daily returns a Leveraged and Inverse Leveraged ETF's or Inverse ETF's returns over periods other than one day will likely differ in amount and, particularly in the case of the Leveraged and Inverse Leveraged ETFs, possibly direction from the performance of their respective Target(s) for the same period. For certain Leveraged and Inverse Leveraged ETFs that seek up to 200% or up to -200% leveraged exposure, the Manager anticipates, under normal market conditions, managing the leverage ratio as close to two times (200%) as practicable however, the Manager may, at its sole discretion, change the leverage ratio based on its assessment of the current market conditions and negotiations with the respective ETF's counterparties at that time. Hedging costs charged to BetaPro Products reduce the value of the forward price payable to that ETF. Due to the high cost of borrowing the securities of marijuana companies in particular, the hedging costs charged to HMJI are expected to be material and are expected to materially reduce the returns of HMJI to unitholders and materially impair the ability of HMJI to meet its investment objectives. Currently, the manager expects the hedging costs to be charged to HMJI and borne by unitholders will be between 10.00% and 45.00% per annum of the aggregate notional exposure of HMJI's forward documents. The hedging costs may increase above this range. The manager publishes on its website, the updated monthly fixed hedging cost for HMJI for the upcoming month as negotiated with the counterparty to the forward documents, based on the then current market conditions. The VIX ETF, which is a 1x ETF, as described in the prospectus, is a speculative investment tool that is not a conventional investment. The VIX ETF's Target is highly volatile. As a result, the VIX ETF is not intended as a stand-alone long-term investment. Historically, the VIX ETF's Target has tended to revert to a historical mean. As a result, the performance of the VIX ETF's Target is expected to be negative over the longer term and neither the VIX ETF nor its target is expected to have positive long-term performance. BetaPro Inverse Bitcoin ETF ("BITI"), which is an up to -1X ETF, as described in the prospectus, are speculative investment tools that are not conventional investments. Its target, an index which replicates exposure to rolling Bitcoin Futures and not the spot price of Bitcoin, is highly volatile. As a result, the ETF is not intended as a stand-alone investment. There are inherent risks associated with products linked to crypto-assets, including Bitcoin Futures. While Bitcoin Futures are traded on a regulated exchange and cleared by regulated central counterparties, direct or indirect exposure to the high level of risk of Bitcoin Futures will not be suitable for all types of investors. An investment in any of the BetaPro Products is not intended as a complete investment program and is appropriate only for investors who have the capacity to absorb a loss of some or all of their investment. **Please read the full risk disclosure in the prospectus before investing. Investors should monitor their holdings in BetaPro Products and their performance at least as frequently as daily to ensure such investment(s) remain consistent with their investment strategies.**

Horizons Total Return Index ETFs ("Horizons TRI ETFs") are generally index-tracking ETFs that use an innovative investment structure known as a Total Return Swap to deliver index returns in a low-cost and tax-efficient manner. Unlike a physical replication ETF that typically purchases the securities found in the relevant index in the same proportions as the index, most Horizons TRI ETFs use a synthetic structure that never buys the securities of an index directly. Instead, the ETF receives the total return of the index through entering into a Total Return Swap agreement with one or more counterparties, typically large financial institutions, which will provide the ETF with the total return of the index in exchange for the interest earned on the cash held by the ETF. Any distributions which are paid by the index constituents are reflected automatically in the net asset value (NAV) of the ETF. As a result, the Horizons TRI ETF receives the total return of the index (before fees), which is reflected in the ETF's share price, and investors are not expected to receive any taxable distributions. Certain Horizons TRI ETFs (Horizons Nasdaq-100® Index ETF and Horizons US Large Cap Index ETF) use physical replication instead of a total return swap. The Horizons Cash Maximizer ETF and Horizons USD Cash Maximizer ETF use cash accounts and do not track an index but rather a compounding rate of interest paid on the cash deposits that can change over time.

Horizons Psychedelic Stock Index ETF ("PSYK") is expected to invest in, and indirectly derive revenues from, companies in the psychedelics industry engaged in legal activities involving psychedelic drugs and substances. While the medical and adult use of certain psychedelic drugs and substances are generally prohibited under U.S. federal law, despite this prohibition, a limited number of states have either sought to decriminalize or authorize the medical use of certain psychedelic drugs and substances in limited circumstances. Clinical trials involving psychedelic drugs and substances are, however, permitted, provided they comply with both state and federal laws applicable to such trials. PSYK will passively invest in companies engaged in legal activities involving psychedelic drugs and substances in the U.S. where state and federal laws permit such activities. Such companies may also be involved in the Canadian legal psychedelics industry. Please read the full risk disclosure in the prospectus before investing.
